

## Guide Your Tour towards the digital Age!

### Sennheiser TourGuide 2020-D (6 Language Channels)

The new TourGuide 2020-D from Sennheiser is based on digital radio-transmission and is therefore free of noise and without interrupts. The clear sound is convincing. The system allows to be used as a small portable interpreter system (translation system). If combined with more TourGuide-sets, a larger circle of people can be supported. With up to 6 channels using several sets of the TourGuide system, they can be split up to the appropriate number of persons of the different languages, thus a larger circle of multi lingual group can be served.

### Stethoset TourGuide Receiver HDE 2020

The receiver is comfortable worn and despite containing so much technology weighs just 70 grams. This truly unique device integrates both the receiver and headphones and delivers a number of advantages. The powerful battery ensures that the device will work for up to 8 hours.

The reception-area outdoor is approx. 100m, indoor is the reception area approx. 50m.

### The Transmitter SK 2020 D

The bodypack transmitter with an HS 2 Head-set microphone, it will give you total freedom of movement during your tour. You will have both hands free to describe an object, make a presentation and express your point. The back-lit display confirms channel choice and the status of the battery. Two jacks for the microphone and line ensure variable utilization. For example, you will be able to transmit an external audio source such as music from a portable CD player via your transmitter and continue to talk or mute the microphone.

### Headset-Micro HS 2-ew or Hand-held Micro SKM 2020

The hands-free headset microphone will enable you to comfortably and easily present anything that you wish to present. The headset has broadcast quality and provides a very clear sound. Instead of the bodypack a hand-held micro is available with an excellent sound due to the digital technology used.
